

ROUILLARD

—WISP

WISP diving panels divide open areas into functional and aesthetic zones. Freestanding and upholstered, they create ideal alcoves for meetings or precision work, while improving acoustic comfort. A version with an integrated table optimizes tight spaces, while an optional whiteboard encourages note-taking and collaborative discussions. Available in two upholstery styles, with a wide choice of fabrics and colors, they can also be mounted on casters for greater mobility. Versatile and refined, they adapt to your needs and enhance your workspace.
